Question Demographic

Thank you for participating in this survey. Please answer several questions below before starting.

demographic 1 *

Which of the following best describes the sector you primarily work in?

- ○ Agriculture, Food and Natural Resources
- ○ Architecture and Construction
- ○ Arts
- ○ Business Management & Administration
- ○ Education & Training
- ○ Finance
- ○ Government & Public Administration
- ○ Medicine
- ○ Hospitality & Tourism
- ○ Information Technology
- ○ Legal
- ○ Policing
- ○ Military
- ○ Manufacturing
- ○ Marketing & Sales
- ○ Retail
- ○ Science, Technology, Engineering & Mathematics
- ○ Social Sciences
- ○ Transportation, Distribution & Logistics
- ○ Other
- ○ Rather not say

My Survey

Overview

document simplicity survey

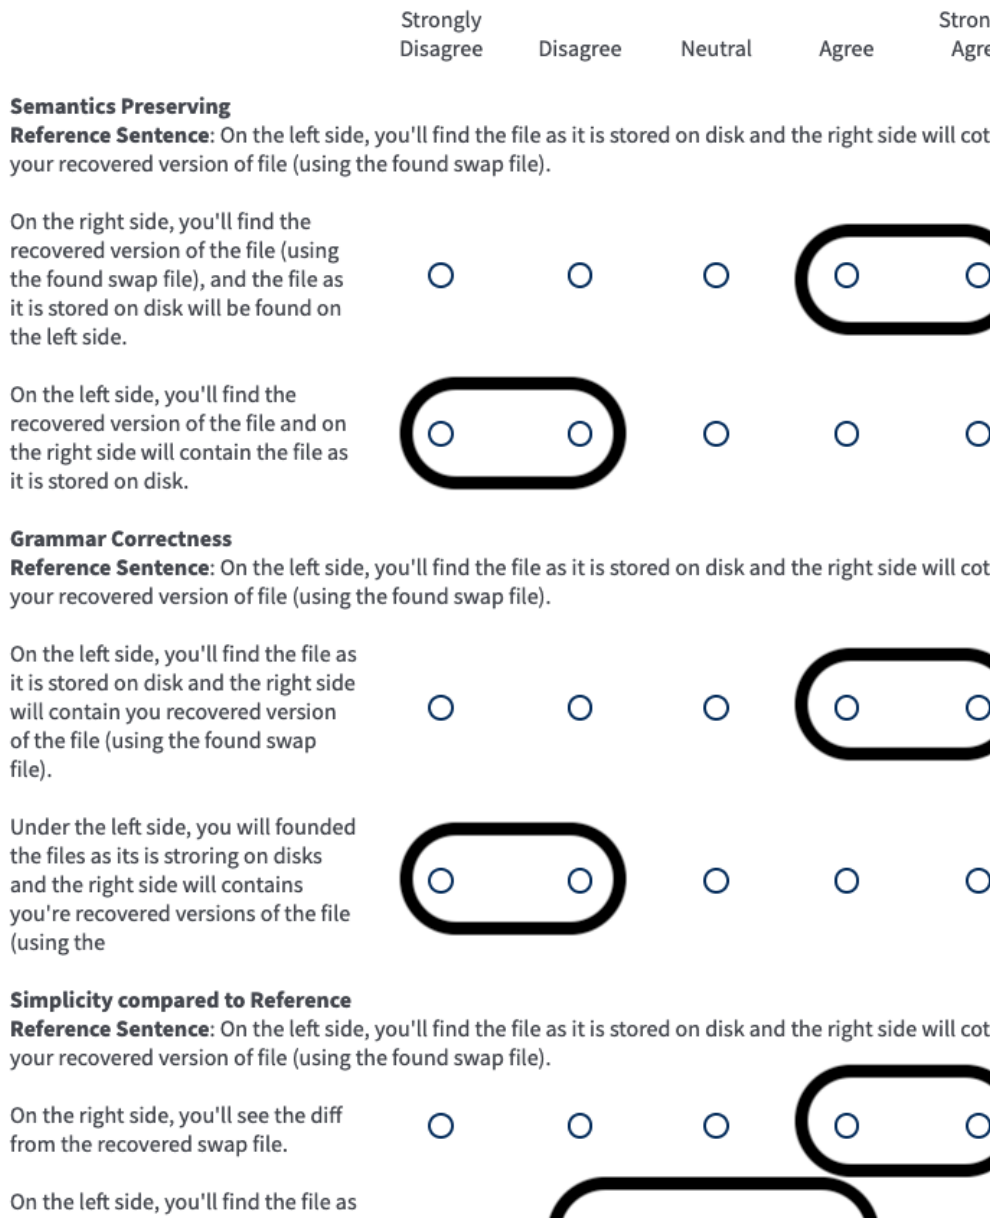
In this survey, you will be provided with one reference sentence, along with several sentences to compare. You need to evaluate the semantic, syntactic and simplicity level of each sentence compared to the reference sentence. The details are as follows:

- Semantic: The sentence retains all semantics of the reference sentence.
- Grammar: The sentence is grammatically correct.
- Simplicity: The sentence is easier to understand than the reference sentence.

You will evaluate each option on a scale from 1 to 5 from strongly disagree to strongly agree. There are 10 groups of sentences you need to evaluate. Thank you for participating in this survey.

Below we provide some examples with a indicating score just for your reference, please have a look before continue the survey:

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right si will cotain your recovered version of file (using the found swap file).



it is stored on disk and the right side will cotain your recovered version of file (using the found swap file).

Situated towards the left-hand quadrant, you will discover a representation of the aforementioned digital document precisely as it maintains its existence within the confines of the computer's physical storage medium. Correspondingly, within the diametrically opposite right-hand division, one shall encounter the regenerated rendition of the file in question, its restoration having been successfully accomplished through the utilization of the incidentally unearthed temporary backup copy, colloquially termed a swap file.

Q12

I have read the above examples.

- ○ Yes
