Question Demographic ⋮

Thank you for participating in this survey. Please answer several questions below before starting.

demographic 1 ✱ ⋮

Which of the following best describes the sector you primarily work in?

- ☐ Agriculture, Food and Natural Resources
- ☐ Agriculture, Food and Natural Resources
- ☐ Arts
- ☐ Business Management & Administration
- ☐ Education & Training
- ☐ Finance
- ☐ Government & Public Administration
- ☐ Medicine
- ☐ Hospitality & Tourism
- ☐ Information Technology
- ☐ Legal
- ☐ Policing
- ☐ Military
- ☐ Manufacturing
- ☐ Marketing & Sales
- ☐ Retail
- ☐ Science, Technology, Engineering & Mathematics
- ☐ Social Sciences
- ☐ Transportation, Distribution & Logistics
- ☐ Other
- ☐ Rather not say

My Survey

document simplicity survey

In this survey, you will be provided with one reference sentence, along with several sentences to compare. You need to evaluate the semantic, syntactic and simplicity level of each sentence compared to the reference sentence. The details are as follows:

- Semantic: The sentence retains all semantics of the reference sentence.
- Grammar: The sentence is grammatically correct.
- Simplicity: The sentence is easier to understand than the reference sentence.

You will evaluate each option on a scale from 1 to 5 from strongly disagree to strongly agree. There are 10 groups of sentences you need to evaluate. Thank you for participating in this survey.

Below we provide some examples with a indicating score just for your reference, please have a look before continue the survey:

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

Strongly Disagree Disagree Neutral Agree Strongly Agree

Semantics Preserving

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the right side, you'll find the recovered version of the file (using the found swap file), and the file as it is stored on disk will be found on the left side.

On the left side, you'll find the recovered version of the file and on the right side will contain the file as it is stored on disk.

Grammar Correctness

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of the file (using the found swap file).

Under the left side, you will find the files as it is stored on disks and the right side will contain your recovered versions of the file (using the

Simplicity compared to Reference

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the right side, you'll see the difference from the recovered swap file.

On the left side, you'll find the file as

it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

Situated towards the left-hand quadrant, you will discover a representation of the aforementioned digital document precisely as it maintains its existence within the confines of the computer's physical storage medium. Correspondingly, within the diametrically opposite right-hand division, one shall encounter the regenerated rendition of the file in question, its restoration having been successfully accomplished through the utilization of the incidentally unearthed temporary backup copy, colloquially termed a swap file.

Q12

I have read the above examples.

☐ Yes

update precompiled structure,
make it possible to parallelize
selects/updates any connection to
transducers?

com-paths There's about a 5x speed
difference between the following two
invocations of update: (def
precompiled (comp-structure-
paths ALL :a even?)) (update
[ALL :a even?] structure)
(update precompiled structure)
make it possible to parallelize
selects/updates any connection to
transducers?

There's about a 5x speed difference
between the next two invocations of
update.

There's how to make a pull request
between the following two mode : (def
precompiled (comp-structure-
paths ALL :a even?)) (update
[ALL :a even?] structure)
(update precompiled structure)
this can make it easier to make any of
ajax app.

There's about a 5x speed difference
between the following two invocations of
update: (def precompiled (comp-
structure-paths ALL :a
even?)) (update [ALL :a
even?] structure) (update
precompiled structure) make it
possible to parallelize selects/updates
any connection to transducers?
selects/updates any connection to
transducers? selects/updates any
connection to transducers?
selects/updates any connection to
transducers? selects/updates any
connection to transducers?
selects/updates .

Question 9

Reference Sentence: Note: the mathematics genealogy project data changes over time, so it is possible that if the examples below are re-run, the results will look different.

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
The sentence retains all semantics of the reference sentence Reference Sentence: Note: the mathematics genealogy project data changes over time, so it is possible that if the examples below are re-run, the results will look different. It is possible that if the results below are re-run , the results will look different. Note: the mathematics tutorial processing project data changes over time, so it is possible that if the examples below are re-run, the results will look different. Note: the mathematics genealogy project data changes over time, so it is possible that if the examples below are re-run, the results will look different. the results will look different. the results will look different. the results will look different. . Note: the <code><code_small></code> option is the data will be run, so if it doesn't run.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Grammar Correctness Reference Sentence: Note: the mathematics genealogy project data changes over time, so it is possible that if the examples below are re-run, the results will look different. It is possible that if the results below are re-run, the results will look different. Note: the mathematics tutorial processing project data changes over time, so it is possible that if the examples below are re-run, the results will look different. Note: the mathematics genealogy project data changes over time, so it is possible that if the examples below are re-run, the results will look different. the results will look different. the results will look different. the results will look different. . Reference Sentence: If you use hibernate 5.0.0 <url> and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of com.github.marshall.threeten-jpa.

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
<p>The sentence retains all semantics of the reference sentence</p> <p>Reference Sentence: If you use hibernate 5.0.0 <url> and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of</p> <p>com.github.marschall:threeten-jpa.</p> <p>If you use hibernate 5.0.0 <url> and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of</p> <p>com.github.marschall:threeten-jpa.</p> <p>If you use hibernate 5 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 .</p> <p>If you use</p> <p>com.github.marschall:threeten-jpa ,</p> <p>you ' ll need 0 . 2 . 2 . 0 module (see https :// github . com / module - 2) <url> if you use the</p> <p><code_small> module , you ' re using the</p> <p><code_small> module.</p> <p>If <url> you're and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of</p> <p>com.github.marschall:threeten-jpa.</p> <p><url> you're using the equivalent of</p> <p><code_small>. <url> you're using the equivalent of</p> <p><code_small>. <url> you're using the equivalent of</p> <p><code_small>. <url> you're using the equivalent of</p> <p><code_small>. <url> you're using the equivalent of</p> <p><code_small>. <url> you're using the equivalent of</p> <p><code_small>. <url>)</p> <p>The purple monkey dishwasher sang shenanigans on the moon with unicorns and marshmallow socks.</p>					
<p>Grammar Correctness</p> <p>Reference Sentence: If you use hibernate 5.0.0 <url> and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of</p> <p>com.github.marschall:threeten-jpa.</p> <p>If you use hibernate 5.0.0 <url> and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>) you're using the equivalent of</p> <p>com.github.marschall:threeten-jpa.</p> <p>If you use hibernate 5 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 .</p> <p>If you use</p> <p>com.github.marschall:threeten-jpa ,</p> <p>you ' ll need 0 . 2 . 2 . 0 module (see https :// github . com / module - 2) <url> if you use the</p> <p><code_small> module , you ' re using the</p> <p><code_small> module.</p> <p>If <url> you're and the hibernate-java8 module (no longer needed for hibernate 5.2.0 <url>)</p>					

(no longer needed for hibernate 5.2.0 <url>)
you're using the equivalent of
`com.github.marschall:threeten-jpa.`
<url>) you're using the equivalent of
<code_small>. <url>) you're using the equivalent
of <code_small>. <url>) you're using the
equivalent of <code_small>. <url>) you're using
the equivalent of <code_small>. <url>) you're
using the equivalent of <code_small>. <url>)
you're using the equivalent of <code_small>.
<url>)

The purple monkey dishwasher sang shenanigans
on the moon with unicorns and marshmallow
socks.

Simplicity compared to Reference

Reference Sentence: If you use hibernate 5.0.0
<url> and the hibernate-java8 module (no longer
needed for hibernate 5.2.0 <url>) you're using the
equivalent of

`com.github.marschall:threeten-jpa.`

If you use hibernate 5.0.0 <url> and the hibernate-
java8 module (no longer needed for hibernate
5.2.0 <url>) you're using the equivalent of
`com.github.marschall:threeten-jpa.`

If you use hibernate 5 . 0 . 0 . 0 . 0 . 0 . 0 . 0 . 0 .
. 0 .

If you use
`com.github.marschall:threeten-jpa ,`
you ' ll need 0 . 2 . 2 . 0 module (see [https://github . com / module - 2](https://github.com/module-2)) <url> if you use the
<code_small> module , you ' re using the
<code_small> module.

If <url>) you're and the hibernate-java8 module
(no longer needed for hibernate 5.2.0 <url>)
you're using the equivalent of
`com.github.marschall:threeten-jpa.`
<url>) you're using the equivalent of
<code_small>. <url>) you're using the equivalent
of <code_small>. <url>) you're using the
equivalent of <code_small>. <url>) you're
using the equivalent of <code_small>. <url>) you're
using the equivalent of <code_small>. <url>)
you're using the equivalent of <code_small>.
<url>)

The purple monkey dishwasher sang shenanigans
on the moon with unicorns and marshmallow
socks.
