My Survey

document simplicity survey

In this survey, you will be provided with one reference sentence, along with several sentences to compare. You need to evaluate the semantic, syntactic and simplicity level of each sentence compared to the reference sentence. The details are as follows:

- Semantic: The sentence retains all semantics of the reference sentence.
- Grammar: The sentence is grammatically correct.
- Simplicity: The sentence is easier to understand than the reference sentence.

You will evaluate each option on a scale from 1 to 5 from strongly disagree to strongly agree. There are 10 groups of sentences you need to evaluate. Thank you for participating in this survey.

Below we provide some examples with a indicating score just for your reference, please have a look before continue the survey:

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

Strongly Disagree Disagree Neutral Agree Strongly Agree

Semantics Preserving

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the right side, you'll find the recovered version of the file (using the found swap file), and the file as it is stored on disk will be found on the left side.

On the left side, you'll find the recovered version of the file and on the right side will contain the file as it is stored on disk.

Grammar Correctness

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of the file (using the found swap file).

Under the left side, you will founded the files as its is stroring on disks and the right side will contains you're recovered versions of the file (using the

Simplicity compared to Reference

Reference Sentence: On the left side, you'll find the file as it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

On the right side, you'll see the diff from the recovered swap file.

On the left side, you'll find the file as

it is stored on disk and the right side will contain your recovered version of file (using the found swap file).

Situated towards the left-hand quadrant, you will discover a representation of the aforementioned digital document precisely as it maintains its existence within the confines of the computer's physical storage medium. Correspondingly, within the diametrically opposite right-hand division, one shall encounter the regenerated rendition of the file in question, its restoration having been successfully accomplished through the utilization of the incidentally unearthed temporary backup copy, colloquially termed a swap file.

Q12

I have read the above examples.

☐ Yes

Question 10

Reference Sentence: The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => ".

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
The sentence retains all semantics of the reference sentence					
Reference Sentence: The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => ".					
The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => " or ".	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
He uses 1.0 for authentication 2.0.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
An array key is a hash of hashes to each key, where the key is a hash of key at a ' key.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The path this file is being written to. written	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Grammar Correctness					
Reference Sentence: The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => ".					
The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => " or ".	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
He uses 1.0 for authentication 2.0.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
An array key is a hash of hashes to each key, where the key is a hash of key at a ' key.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The path this file is being written to. written	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Simplicity compared to Reference					
Reference Sentence: The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => ".					
The servers resource expects an array of hashes where each hash is required to contain at a key-value pair of 'port' => " or ".	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
He uses 1.0 for authentication 2.0.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
An array key is a hash of hashes to each key, where the key is a hash of key at a ' key.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The path this file is being written to. written	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
